SUMMARY

Senior Full Stack Software Engineer with 8+ years of experience building scalable enterprise web applications across the JavaScript and TypeScript ecosystem. Strong expertise in Angular, JavaScript and TypeScript, with experience in React, Node.js, Express.js, REST APIs, MongoDB. Experienced in frontend architecture, reusable platforms, application modernization, framework upgrades, Micro-frontends, performance optimization and end-to-end feature delivery. Led a team of 10+ engineers and collaborated across product and backend teams in large enterprise environments.

EXPERIENCE

Planful *October 2022 - Present*
Senior Software Engineer - II ***Key Technologies : Angular, React, JavaScript, ASP.NET***

- Core engineer in the platform team, building and maintaining reusable **Angular components, shared libraries, and frontend infrastructure** used across multiple product teams.
- Took ownership of major **framework and dependency upgrades** including Angular (15 → 20) and key UI libraries (Syncfusion, SpreadJS) improving maintainability and enabling use of modern features while keeping existing functionality stable.
- Enabled integration of **Angular UI** into legacy **ASPX** pages by exposing components as **Web Components / Custom Elements**, supporting incremental modernization without large-scale rewrites.
- Published reusable UI components using **Storybook**, enabling faster adoption and reducing duplicate development across teams.
- Core contributor in a company **hackathon**; built an **Angular component scanning tool** with **AI-based analysis** to identify performance issues and optimization opportunities.
- Contributed to platform modules including **User and Role Management, GenAI,** implementing requirements end-to-end.

Rakuten Symphony *July 2020 - October 2022*
Senior Software Engineer ***Key Technologies : Angular, TypeScript, Microfrontend, RxJS***

- Led UI development for **Omnidesk**, a customer support and ticket monitoring platform used to track complaints & customer details.
- Developed scalable **Angular 8+** modules in a legacy **AngularJS** environment, enabling a modern frontend architecture.
- Owned the UI for an OmniDesk module and led a team of **10+ engineers**, driving feature delivery and code quality.
- Built reusable **core UI components** adopted across teams, improving development speed and ensuring consistent UI across modules.
- Identified & resolved Angular HTML sanitization limits affecting inline styles by introducing an alternative HTML parsing strategy.
- Performed Angular upgrades from **v8 → v10** for the Omnidesk module, improving stability and maintainability.
- **Collaborated with cross-functional teams** including backend and product teams to deliver scalable and maintainable solutions

Rakuten Symphony (Innoeye Technologies) *June 2018 - June 2020*
Software Engineer ***Key Technologies : AngularJS, JavaScript, Html, CSS***

- Contributed to **NetVelocity**, an analytics platform providing near real-time network coverage insights from device and network data.
- Implemented **charts and grid-based UI components** to visualize network performance and coverage metrics.
- Improved UI performance and stability by identifying and resolving rendering and layout issues.

PATENT

- Co-inventor of an enterprise software-related patent : (System and method for presenting information from different applications in an integrated manner). **Patent ID: US12120188B2** (patents.google.com/patent/US12120188B2).

TECHNICAL SKILLS

- **Frontend:** Angular , JavaScript, TypeScript, React, HTML, CSS, SCSS, RxJS, NgRx, Karma-Jasmine
- **UI Libraries:** Angular Material, Syncfusion, Tailwind CSS, Ag-Grid, Highcharts, Storybook
- **Backend:** Node.js, Express.js, MongoDB, SQL, REST APIs
- **Architecture:** Micro-frontend, Monolithic
- **Tools:** Git, Bitbucket, Jira, VS Code, Postman, GitHub Copilot, Claude, Codex

EDUCATION

Bachelor of Engineering in Computer Science || *Swami Vivekanand College Of Engineering, Indore, India* || ***2014 - 2018*** || *8.14 CGPA*

SELECTED ACHIEVEMENTS

- **Solved 250+ Data Structures and Algorithms (DSA) problems** on LeetCode, focusing on arrays, strings, trees, recursion and DP.
- **Rakuten Silver Medal (Development, 2021)** - Recognized for outstanding delivery performance on the Omnidesk project.
